LinkedIn: www.linkedin.com/in/smitasaroj Github: <https://github.com/SMITASAROJ>

TECHNICAL SKILLS

Programming Languages:

- Python
- SQL

Data Analysis & Visualization:

- Pandas
- NumPy
- Excel
- Power BI
- Matplotlib
- Seaborn

Machine Learning & AI:

- Scikit-learn
- NLP
- Recommendation Systems
- LLM Applications
- RAG
- AI Agents

Databases:

- MySQL
- SQLite

Data Handling:

- Data Cleaning
- Data Preprocessing
- CSV, Excel, JSON Processing

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code

EDUCATION

K.E.S. College of Arts And Commerce - Mumbai, University
BACHELOR'S OF SCIENCE IN INFORMATION TECHNOLOGY
(B.Sc - IT),
8.65 CGPA (2019-2022)

Shri Tikamdas Purshotam Bhatia
College of Science
Higher Secondary Education (Maharashtra State , Board),
59.08% (2016-2018)

Shri Rajdevi Hindi High School
SSC (Maharashtra State , Board)
77.40% (2016)

SUMMARY

Professional with a background in administration and a growing passion for AI and Machine Learning. Gaining hands-on experience through projects in Python, NLP, and Generative AI, and looking to contribute to innovative, data-driven solutions.

PROJECTS

Multi-Agent Research System

- Built a multi-agent AI research system to automate web search, content extraction, and report generation.
- Designed specialized AI agents for research, analysis, writing, and review to improve report quality.
- Integrated Tavily Search, BeautifulSoup, and Groq LLM for real-time information retrieval and intelligent summarization.
- Deployed the application on Streamlit Community Cloud with an interactive user interface.

Tech Stack: Python | LangGraph | LangChain | Groq | Tavily AI | BeautifulSoup | Streamlit

Live Demo: <https://your-app-name.streamlit.app>

GitHub: <https://github.com/SMITASAROJ/multi-agent-research>

Movie Recommendation System

- Developed a recommendation system using NLP, TF-IDF, and cosine similarity.
- Generated movie suggestions based on content similarity.
- Performed data cleaning and preprocessing on movie datasets.
- Applied NLP techniques to process movie descriptions and metadata.

Tech Stack: Python, Pandas, Scikit-learn, NLP

EXPERIENCE

DATA ANALYST | NEOPLUS MEDICAL EQUIPMENTS JAN/2025 – Till date

- Analyzed hospital and healthcare market data to identify potential customers and support medical equipment sales initiatives.
- Prepared and maintained sales reports, customer databases, and performance dashboards to track business growth and sales targets.
- Conducted market research to identify high-demand regions, hospitals, and healthcare facilities for product expansion.
- Collaborated with the sales team by providing data-driven insights that improved customer targeting and lead generation efforts.
- Monitored sales trends, product demand, and customer behavior to support strategic business decisions.
